Zohaib Ahmad FA24-BCS-121

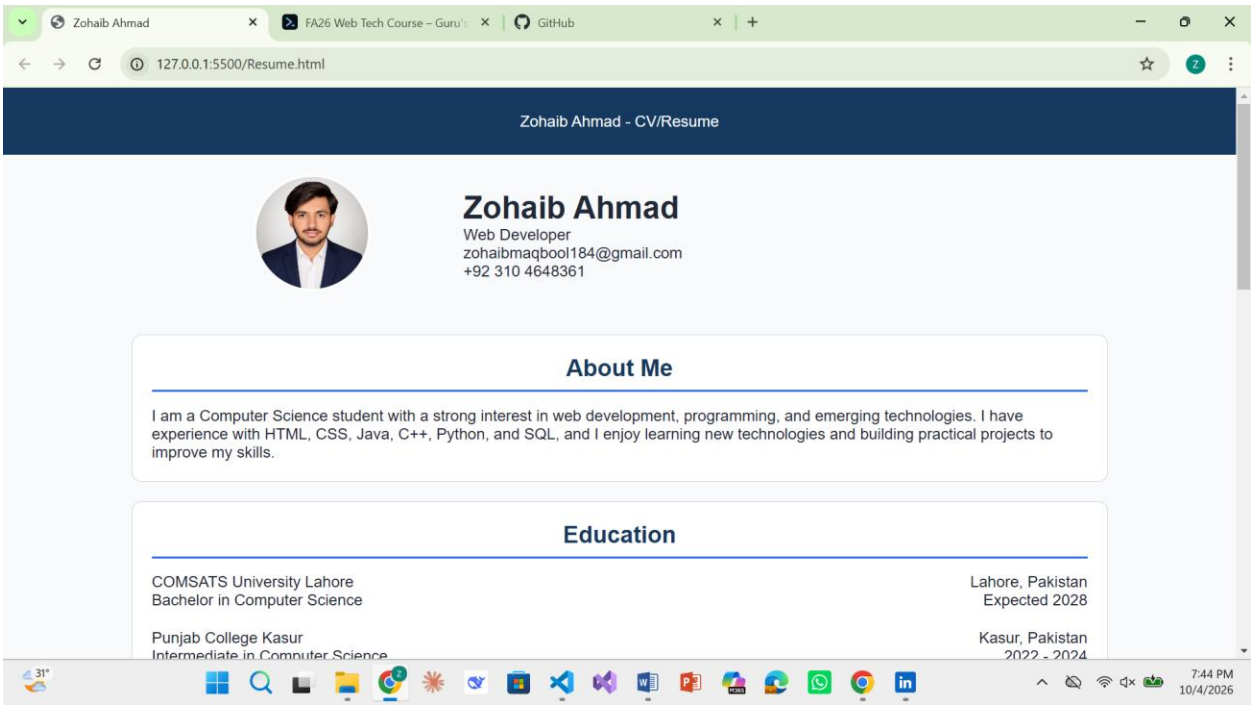

Assignment 1 — Your Personal CV Page

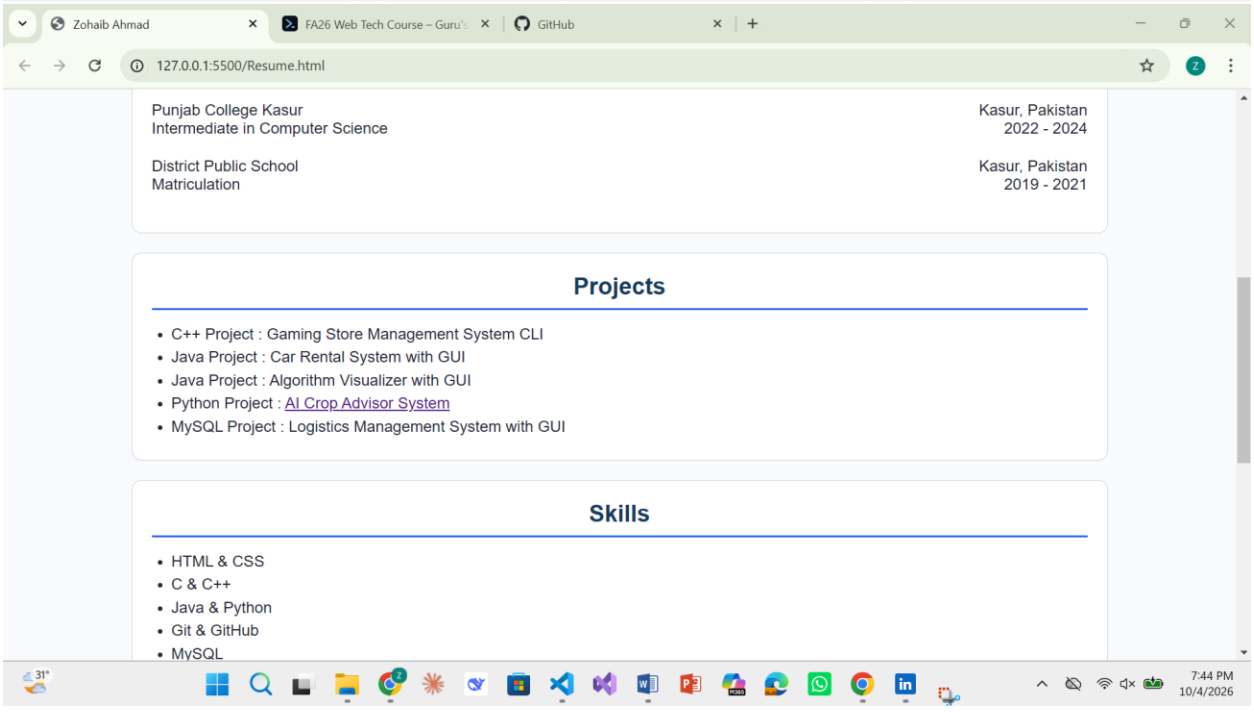

Difficulty: Foundational · **Covers:** Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model) · **Folder:** assignment-1/

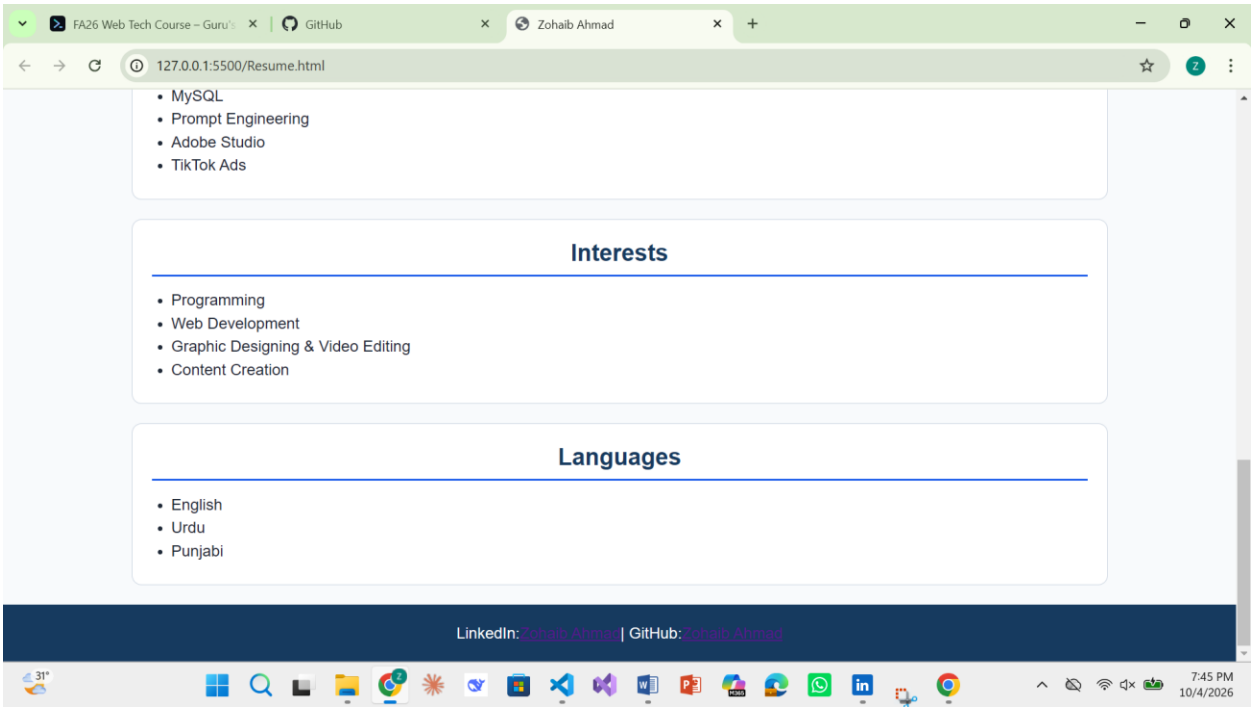

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An "About Me" section.
- An "Education" section listing your academic history in a semantic list or table.
- A "Skills" section.
- A "Contact" section with a real <a href="mailto:..."> link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout — <header>, <nav>, <main>, <section>, <article>, <footer> as appropriate, not a page built entirely out of unstyled s.
- Styling entirely in a separate styles.css file (external stylesheet, not inline style="" attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.
